Sheeps &amp; Goats

## PRODUCT DETAILS

### PRODUCT OVERVIEW

Series: Preventive  
Preparative form: powder  
Composition: High fermentable carbohydrates (sugar), vegetable protein  
Metabolizable energy: 8.4 MJ/kg

### DESCRIPTION

“PROFIT FEED” carbohydrate prebiotic feed additive (50% of the product is molasses) is a healthy and sweet fodder with pleasant smell that improves digestion and strengthens health of cattle: goats and ewes, swine, poultry and wild animals. The feed has nutritive, prebiotic and hepatoprotective properties.

### PACKAGING

Polyethylene bags, 25 kg

### STORAGE CONDITIONS

Store in a cool and dry place at a temperature if 25°C or below, with humidity of no more than 75%. Shelf life (provided the storage conditions are observed) is 6 months, in the warm season – 2 months as from the date of production.

### SIDE EFFECTS

This product is made of natural components. It does not contain antibiotics, palm oil, hormones and GMOs. No side effects,

contraindications or complications in use of the product. Meat and milk of animals can be used without limitations

For this purpose, you should mix the feed additive with the basic feed (bran, grain mix, hay) in accordance with the daily ration and give the mixture to the animals, divided into two feedings. Daily consumption rate of PROFIT FEED carbohydrate prebiotic feed, g/per animal:

<b>Group of animals</b>	<b>g/per animal per day</b>
Milk cows	1.000 — 1.500
Dry cows	500 — 700
Veal calves at age from 15 days	100 — 150
Calves and young stock at age from 1 to 6 months	150 — 300
Calves at age from 7 to 12 months	300 — 500
Young stock at age from 13 to 18 months	500 — 1.000
Second dry period and heifers 2 weeks before calving	500 — 1.000

## FEATURES

- Makes any food tasty, because 50% of the product is molasses;
- It has nutritional, prebiotic and hepatoprotective properties. This helps to avoid early slaughter and maintains long-term stable operation of animals;
- Provides a balance of sugar and energy in the diet, regulates the pH of the rumen. It stimulates the production of meat and milk, and also contributes to the healthy growth and development of young animals;
- Provides the body with metabolic energy for active life.

## INSTRUCTION

### SPECIAL INSTRUCTIONS AND DATA

PROFIT FEED carbohydrate prebiotic feed should be added to the animals' diet. For this purpose, you should mix the feed additive with the basic feed (bran, grain mix, hay) in accordance with the daily ration and give the mixture to the animals, divided into two feedings.
