About product

profitfeed.net

PROFIT FEED carbohydrate prebiotic feed is a healthy and sweet feed with attractive smell for its better digestion and improved livestock health for cattle, goats and ewes, swine, poultry, and wild animals. The feed has nutritive, prebiotic and hepatoprotective properties.

- It helps to avoid early animal culling and keeps lengthy stable performance of animals;
- It provides a sugar and energy balance in the diet, regulates the rumen pH with a large number of concentrates, roughage and bulk feed of poor quality;
- It stimulates meat and milk production and also facilitates healthy growth and development of young stock.

THE FEED IS WELL PACKED AND IS WAITING FOR SHIPMENT

PROFIT FEED Additive Ingredients:

High fermentable carbohydrates (sugar), vegetable protein

Metabolizable energy: not less than 8.6 MJ/kg

How to Use PROFIT FEED Additive:

profitfeed.net

Take any feed you have.

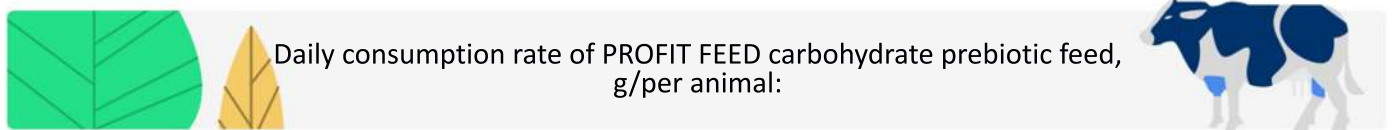

Add PROFIT FEED additive to any feed you have

You get a high-energy feed. The cows will say: "Thank you!"

Dosage and Instructions for Use

PROFIT FEED carbohydrate prebiotic feed should be added to the animals' diet. For this purpose, you should mix the feed additive with the basic feed (bran, grain mix, hay) in accordance with the daily ration and give the mixture to the animals, divided into two feedings.

Daily consumption rate of PROFIT FEED carbohydrate prebiotic feed, g/per animal:

| Group of animals | g/per animal per day |
|--|----------------------|
| Milk cows | 1000 - 1500 |
| Dry cows | 500 - 700 |
| Veal calves at age from 15 days | 100 - 150 |
| Calves and young stock at age from 1 to 6 months | 150 - 300 |
| Calves at age from 7 to 12 months | 300 - 500 |
| Young stock at age from 13 to 18 months | 500 - 1000 |
| Second dry period and heifers 2 weeks before calving | 500 - 1000 |

Attention: ensure animals have constant access to water.
